

Hi-Load Frames

EDC Shoring features a selection of products focused on ease of use and wide ranges of adjustment. EDC provides the best, most economical, most versatile shoring frames available. They can be intermixed to achieve virtually any shoring configuration and are designed to provide the fastest possible erection, as well as ease in dismantling, storing and trucking.

Shoring Frames

10,000 lbs. per leg
20,000 lbs. per frame

2' frames cut down on timber requirements, and are especially suited for shoring beams and supporting horizontal shoring for slabs.
