FORMING

Form Ties

EDC employs the wrench head style on the Standard Snap Ties to allow for the breakback of the tie end without removal of the forms. All SnapTies are fabricated with an anti-turn device on the ties themselves, to ensure that the tie will not turn in the wall once the concrete has cured. Ties should not be broken back until concrete is set.

ONE FACE SNAP TIE

Standard snap tie with 4" x 4" x 1/4" plate. Customizable to any length.

STANDARD EXPANDED METAL TIE

Made with standard metal washers, or plastic cones. Customizable to any length. Positionable form plate with locking nut. Standard or short breakback.

EDC EXPANDED METAL TIE

Made with standard metal washers, or plastic cones. Customizable to any length. Welded form plate. Standard or short breakback.
